

1) BEFORE

2) AFTER

Please note: Results From Mandurah Performance.

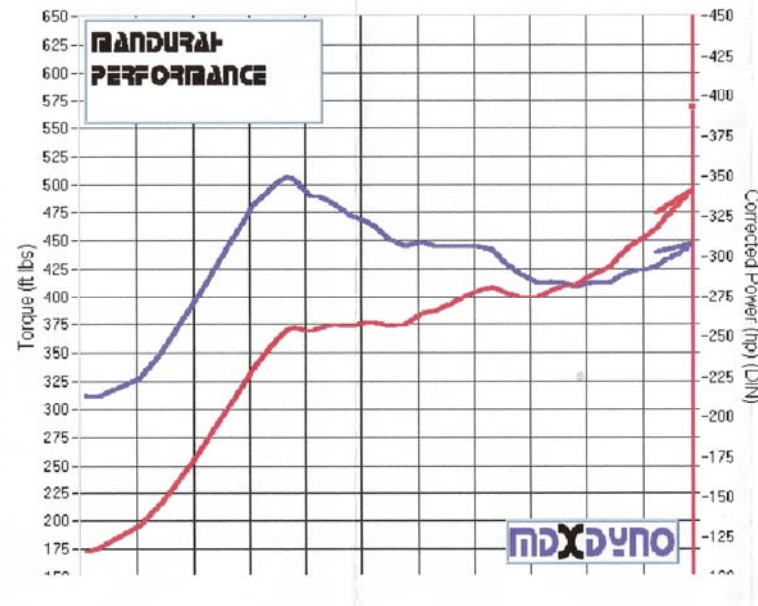

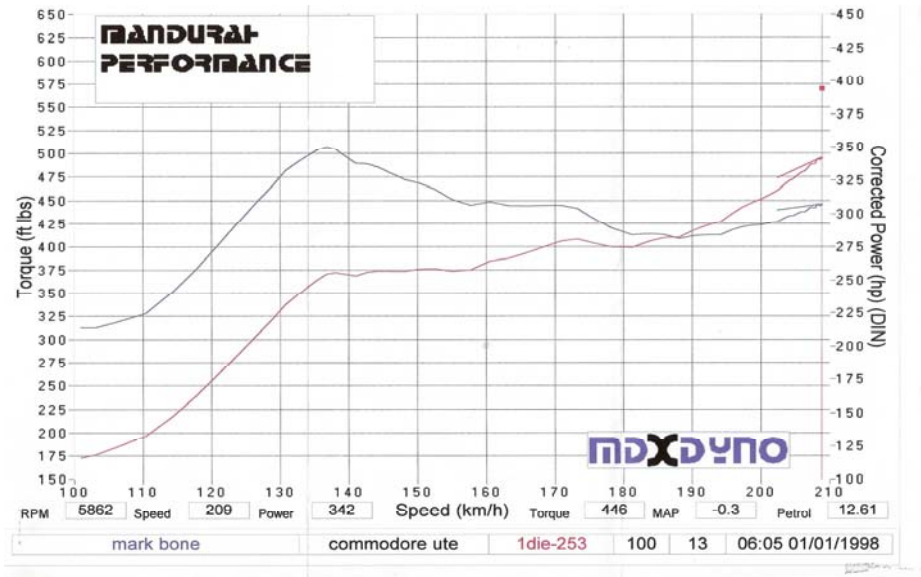

- 1) Increase in Speed from 187 Km/Hr to 202 kph **8% Speed Improvement**
- 2) Increase in Power (Horsepower) from **272 HP** TO 293 HP ... **7.72% Horsepower Improvement**

The horsepower improvement equates to a 7.72% increase ... BUT NOTE ... This vehicle's rev limiter caused the motor to cut out prior to achieving maximum power. Mark Bone advises that after tweaking this limiter he will achieve some 500 or more RPM, which would equate to a further increase in speed and horsepower.

- 3) Further increase in Power after rev limiter adjustment and retuning ... Speed 209 kph and **342 HP**

An overall improvement of: 11.8% for speed and 25% for Horsepower

This vehicle is well maintained, only uses premium high quality fuel, and has been tuned for maximum performance ... therefore, for our solvent to achieve what appears to be a **20 plus percent increase** is a great testament to the integrity of this product.

3) Final Resultants – after retuning
