To whom this may concern,

WE met Mr. Injector in the year 2000. After the demonstration of his on board injection cleaning system we were suitably impressed to use him and his cleaning process as a sub contractor in our automotive business. "BP Kerry motors"

We trialed the product for 6 months, after which we decided to purchase the system. We are more than happy with the results. Using the system we have increased our bottom line.

WE have had customers coming back to us asking, what did you do to our vehicle? It drives so well. We have come to understand how Mr. Injector can give a guarantee like "Feel the difference before you pay"

Over the last 5 years we have come to know Colin Gilbert, the proprietor of Mr. Injector, he is a man of his word. We also can recommend his technical skills on all fuel injection systems both petrol and diesel.

If you have any queries, please contact me.

Regards

Pino Priolo
